**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I have residential Sonic Fiber, which is faster, cheaper and more reliable than Comcast. Upload speeds on Sonic are over 100 times faster than Comcast or ATT. When I upload my camera photos and videos to Flickr, what used to take an hour now takes a minute.

Not to mention that Sonic values privacy and allows me to fileshare. I sometimes torrent very large public domain NASA space files, something which Comcast continually blocked.

ATT services are far too slow to even qualify as broadband. The last time I tried ATT Uverse, the service was down 1/3 of the time. ATT thinks 6 Mbs that doesn't work 1/3 of the time qualifies as acceptable broadband service. Not to mention ATT blocks our sidewalks with their unsightly large Uverse boxes.

In short, Sonic offers a far superior product for a lower price than Comcast or ATT. Neither Comcast nor ATT have remotely competitive services.

Sonic is really the only game in town for high speed Internet. The rest are just garbage. If you had gigabit fiber that never once has gone down, you'd understand.

My wife and I depend on Sonic for both work and leisure. Please don't take away our only reasonable high speed Internet option.
